- Temperature range: ambient to 100 °C (15 °C to 100 °C with available TE cooler)
- Viscosity range: 0.5 mm²/s (cSt) to 10,000 mm²/s (cSt)* in 100-fold increments (easily covering the range of 5 separate manual glass viscometers)
- Fits in roughly the same benchtop area as an analytical balance
- Optional, environmentally friendly Peltier cooling requires no external refrigeration
- A well tested CANNON viscometer platform offers reliability and dependable support

Fully automated benchtop testing

- Up to 12 determinations/hour
- VISCPRO® PC software enables one computer to manage and control up to four instruments
- User-configurable reports may be viewed, printed, saved and exported

Reduced consumable costs

- ASTM D446/ISO 3105 Ubbelohde-style tube reduces solvent usage and disposal costs by 50%
- Automated vial washing and drying enables reuse and reduces vial consumption

Simplified maintenance & test versatility

- Modular bath for easy maintenance access
- Operators physically replace tubes in minutes, eliminating the need for related service calls
- Single-point temperature calibration avoids tube recalibration costs and maximizes flexibility
- Instrument includes standard dual-solvent input

Includes professional installation†, VISCPRO® data storage and management software, viscometer tube, standards, and a high precision digital thermometer

*Some upper viscosity measurements may be limited by test temperature and sample type. Fast run (10-fold range) tubes are also available.

†Installation outside the domestic U.S. may incur additional charges.
